

# Society of '67

Congratulations to the inaugural Society of '67 Scholars!

## MEDICAL STUDENTS

**Jihad Aljabban**  
Ohio State University

**Christopher Trennepohl**  
University of North Carolina, Chapel Hill

**Caroline Early**  
East Carolina University

**Annie Tsay**  
Pennsylvania State University

**Brittney Imblum**  
Pennsylvania State University

## RESIDENTS

**Rizwan Rasheed, MD**  
University of Illinois, Chicago

**Madhuchhanda Roy, MBBS, PhD**  
University of Wisconsin, Madison

**Charles Childers, MD**  
Madigan Army Medical Center

**Kristen Ruby, DO**  
Dartmouth-Hitchcock Medical Center

**Xiangrong He, MD, PhD**  
State University of New York at Buffalo

**Sharon Song, MD**  
University of Pennsylvania

**Nicole Jackson, MD, MPH**  
Louisiana State University, New Orleans

**Laura Toth, DO**  
Dartmouth-Hitchcock Medical Center

**Alison Krywanczyk, MD**  
University of Vermont

**Annika Windon, MD**  
University of Pennsylvania

**Alissa Minkovsky, MD, PhD**  
Brigham and Women's Hospital

## DONATE TODAY and Join the Society of '67!

To make a contribution or to learn more details about the Society of '67, visit:

[www.apcprods.org/societyof67](http://www.apcprods.org/societyof67)

Corporate donations are welcomed, but are not eligible to vote or serve on the Society Board.

## Society of '67 Scholars Report Excerpts

from attending the APC 2017 Annual Meeting in Washington, DC through Travel Awards funded by the Society of '67:

"The **enthusiasm** of my peers for pathology was **infectious!**"

"Throughout the sessions, I felt my perspective was **valued**. I was surprised to be approached by esteemed pathologists who took the time to speak to me about their experiences."

"I gained an undeniably **better perspective** on the field of academic pathology and its direction. The focus on population health was **fantastic** and the keynote speakers were **inspirational**"

"I also took away **meaningful connections** with my fellow Society of '67 Scholars and other professionals. As one of the youngest scholars, it was great to get some **advice on how to best shape my medical school career** early on."

"I am so **honored** to have been chosen to be a Society of '67 Scholar. I thoroughly enjoyed my time and was **inspired** and **motivated** by the many wonderful speakers. I would love to come again. Thank you very much and I do hope I run into everyone in the near future."

"It was such a privilege to gain **exposure** to these current issues and ideas early on in my career. From this meeting, I am bringing back a **new perspective** on pathology's role in patient care."

"More than anything, this conference solidified my **passion for pathology**. It inspired me to continually improve the field and help other medical professionals understand our role in healthcare."

"...it was clear to me the **pivotal role** pathology is already playing in population health and precision medicine."

"Thank you for being so **invested in the future** of academic medicine and creating this opportunity for us."

"My experience at the conference **exceeded my expectations**. It was a great **opportunity to network** with other medical students, residents, chairs, and program directors"

"In all, it was a true pleasure to be chosen as an inaugural Society of '67 Scholar and I was extremely **proud** and **honored** to be surrounded by **active leaders** in pathology. This week I was challenged in my thinking and **inspired** to make greater changes in the field of pathology to best serve the **profession** and the health of our **patients**."

"...the experience overall has been **energizing** and **instructive**. I have come away from the conference with ideas about my own **professional development** and how to be a **better leader** and **more effective communicator**."

"I was pleasantly surprised that they **actually listened** to our opinions and I felt like our **suggestions mattered**."

"For the first time in my medical career I felt more like a **peer** to people...I wanted to join the **academic medical community** but I wasn't sure how I could ever make an **impact** and be **successful**. Coming to this meeting really showed me it was possible."

"This opportunity has given me **confidence** and an **assuredness** that, moving forward, I'm making the right decision."

"As a medical student in my preclinical years, it is easy to get caught up in the basic sciences and think of pathology as nothing more than a sea of pink and purple slides, but I left this meeting not only with a better idea of the **breadth** of what pathology has to offer but **more clarity** and **conviction** in my choice for **pursuing pathology** as a specialty."
