## Open Access Award program

The Open Access Award, established by the *Society of '67* in July 2018, seeks to:

- **PROMOTE** the publication of high-quality original scholarship in a peer-reviewed journal by authors at an early stage of academic development
- **FOSTER** projects of enterprise and national importance with potential for grant-funding eligibility
- **ENABLE** editors and reviewers to mentor young authors in the highest standards of research ethics and academic rigor
- **SUPPORT** the mission of the APC to produce the next generation of outstanding investigators and educational scholars in the field of pathology

### CRITERIA:

The first or corresponding author (qualifying author) must be a medical student, pathology resident or fellow, or junior faculty.

The manuscript must demonstrate strong research methods and the potential for broader or longitudinal study, and fit the scope of *Academic Pathology*. Generally, case reports and quality improvement projects will not qualify, unless they explicitly open the door to other research questions and opportunities.

Preference will be given to research that shows collaboration and teamwork with other specialties at the same institution or with pathologists from multiple institutions.

If accepted, awardees are agreeing to submit their manuscript for publication in *Academic Pathology*. The editors and reviewers are committed to nurturing manuscripts toward acceptance for publication. In the unlikely event that awardees are unable to satisfactorily address reviewer comments in a manner that leads to publication, the award qualification will be rescinded and the award can no longer be claimed for the abstract submitted.

**The award is given through a 4-step process – application, qualification, submission, and acceptance.**

**To apply, authors must submit the following to [mlimson@apcprods.org](mailto:mlimson@apcprods.org):**

- An abstract of no more than 250 words that summarizes the contents of the manuscript to be written and/or

submitted. Please do not subdivide, e.g., Background, Aim, Results, Conclusion, or similar. The abstract must stand alone, and it should be presumed that the reader has some knowledge of the subject but has not read the paper. Abbreviations and reference citations must not be used in the abstract.

- Curriculum vitae of the qualifying author
- List of co-authors and their affiliations

All authors will be recognized as recipients of the Open Access Award. For reference, the International Committee of Medical Journal Editors (ICMJE) definition for authorship shall be followed: <http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html>.

The *Society of '67* Board will review applications on a monthly basis. Within 45 days of receipt of an application, the qualifying author will be notified whether or not the application qualifies for submission.

Authors may qualify to receive up to one award per year.

After qualifying, authors have up to one year to submit their manuscript for peer review and up to two years (from the date of award qualification) to complete the review process and be issued a letter of acceptance. The award qualification will be rescinded and can no longer be claimed for the abstract submitted after two years (from the date of award qualification).

The list of co-authors may only be changed with written approval of the *Society of '67* Board. To change the list of co-authors, the qualifying author must submit a letter to the *Society of '67* Board with an explanation of either a clear, unanticipated role for a new co-author(s) or a clear, unanticipated reason that co-author(s) could not participate in the intended research.

Recipients of the Open Access Award will receive:

- A publication fee waiver for the accepted article.
- Open Access Award attribution on the published article.
- Open Access Award acknowledgement on the journal website.
- Open Access Award recognition on the APC website.

# ACADEMIC PATHOLOGY

THE OFFICIAL PUBLICATION OF THE  
ASSOCIATION OF PATHOLOGY CHAIRS

NOW INDEXED

[www.apcprods.org/journal](http://www.apcprods.org/journal)

**SCOPE:** *Academic Pathology* is an open access journal sponsored by the Association of Pathology Chairs, which was established to give voice to the innovations in leadership and management of academic departments of pathology. These innovations may have impact across the breadth of pathology and laboratory medicine practice. *Academic Pathology* addresses methods for improving patient care (e.g. test utilization protocols, diagnostic management, health outcomes research, genomic testing and data management, clinical informatics and artificial intelligence applications, annotated biorepositories); best practices in inter-professional clinical partnerships; innovative pedagogical approaches to medical education and educational program evaluation in pathology; models for training academic pathologists and advancing academic career development; administrative and organizational models supporting the discipline; and leadership development in academic medical centers, health systems, and other relevant venues. Intended authorship and audiences for *Academic Pathology* are international and reach beyond academic pathology itself, including but not limited to healthcare providers, educators, researchers, and policy-makers. *Academic Pathology* will publish original articles, reviews and commentaries. Contributions should reflect the best practices of pathology as a dynamic 21st century discipline. All articles will be rigorously peer reviewed for relevance and quality.

**INDEXING:** *Academic Pathology* is indexed in the Directory of Open Access Journals (DOAJ), Emerging Sources Citation Index (ESCI), PubMed Central (PMC), and Scopus.
